

PAI-DIESEL INDUSTRY INC.

We have our own joint venture factory for Gasket Set since the year 2000, our factory is the OEM Gaskets supplier to China DONGFENG, HUATAI, LIJIA.

10 years ago, we started to realize that Asbestos material is bad to people's health and may bring cancer, so we began to update our material since that time. Now all our Gasket set use 100% Non-asbestos material, the material has passed the strictest test in China and proved zero asbestos in it, now the material is also the OEM material for China truck leader WEICHAH and YUCHAI.

✘ For Cummins Gasket set, we begin to use USA INTERFACE material, Let me introduce the material details:

1 MP-15 : USA Cummins material

2 N-8092 : USA company McBEE & PAI USA & CTP material

We use MP-15 and N-8092 to our Cummins Gasket set, some products quality even better than McBEE and PAI USA.

✘ For Caterpillar Gasket set, now we are OEM for ITALY company Ellegi | World Gasket.

Ellegi | World Gasket is a famous world supplier since the year 1977.

For more Gasket set information (Parts List / Part Quotation), please contact us with email: sales@pai-diesel.com
